Kitchen inspection evidence

Selected daily-record period: 2026-11-16 to 2026-11-16

Exported at: 2026-11-16T10:00:00+00:00

Exported by: Fictional Owner

Business identity at export

trading name: Fictional Catering

kitchen name: Test Kitchen

revision: 1

This report is a readable evidence snapshot, not a compliance certificate. A signature records who submitted a record and when; it does not independently verify the work.

Daily records use the selected dates. Paper uses overlapping weeks. Safe-method history ends at the selected end date. Allergens are the current export-time snapshot. Management reviews cover whole overlapping four-week periods.

Original scans and completed original FSA pages are not embedded. Download original filed copies and the inspection ZIP separately. Customer-recorded care applicability and current care-method status are included in the library section. Frozen management-review packs are separate downloads.

Daily coverage and gaps

Days without a frozen daily plan are unassessed: requirements and completion are unknown. They are not assumed to have been operating days. Legacy entries are retained as recorded and are not verified structured completions. Exceptions include historic entries; later corrections do not erase them.

2026-11-16 - assessed

Required: 2; completed: 1; outstanding: 1; finalised: No; signed entries: 1; legacy entries: 0; latest flagged slots: 0; all exception entries: 0

Signed daily entries

All submitted entries in the period, including superseded readings. Payloads retain the recorded values, units, corrective actions and original attribution. Use the frozen plan below for field and equipment definitions.

Record 1

id: 1

local day: 2026-11-16

check id: fridges

result: complete

signed name: Fictional Owner

signed at: 2026-11-16T09:00:00+00:00

payload

slot: am

values

fictional fridge: 3.5

corrective action: Fictional demonstration record only

Daily finalisations

Finalisation snapshots and hashes are verified before export. No missing days or signatures are created by this report.

No records in this snapshot

Frozen daily plans

Business identities, equipment, labels and limits are retained as recorded when the day was opened. Limits are customer-recorded settings.

Record 1

day: 2026-11-16

snapshot

business at open

trading name: Fictional Catering

kitchen name: Test Kitchen

notice: Synthetic demonstration fixture. Not a verified production snapshot.

Filed paper index

Original file hashes were verified before export. This section contains issued identities, file references and review records, not the original images or PDFs. Issued sheets without uploads and uploads without reviews remain visible.

reviews

No records in this snapshot

Safe methods and allergen records

Safe-method revisions and care history through end use the selected end date. Current care assessment/method status and allergens are at export time. Care approvals require the exact current site assessment; earlier signed statuses alone do not establish applicability. UNKNOWN is unresolved, not absence or suitability. Vegetarian and vegan values are dietary classifications. Draft, withdrawn and unverified records retain their status.

sfbb history through end

No records in this snapshot

allergens current at export

No records in this snapshot

notice: No fictional procedures or allergen records supplied in this sample.

Management review signatures

Whole four-week review periods overlapping the selected dates are shown, including revisions and their actual signing times. These are digital companion records, not completed original FSA pages. Their frozen evidence packs are available separately.

No records in this snapshot

Source files and limitations

The inspection ZIP contains records/daily_entries.json, records/daily_plan_snapshots.json, records/finalisations.json, records/paper_sheets.json, records/paper_uploads.json, records/paper_reviews.json, records/sfbb_history_through_end.json, allergens/history-at-export.json, allergens/current-at-export.json and reviews/management-review-index.json. Its manifest lists the included files and hashes. Original scan archive paths are recorded in records/paper_uploads.json. Large ranges may require separate shorter exports.
